## SEMINAR: HOW TO PLAN A CAREER AFTER XII (8.2.2022)

With innumerable options available today, deciding a career path can be difficult for the students. It may even seem daunting and overwhelming. They can be filled with doubts, despite the best advice from their friends and family, and wonder if what they are doing is right or not. In order to solve all these doubts related to the career, a seminar was conducted at Sant Nirankari Public School by Aravali College of Engineering & Management on 8 February 2022 for the students of Class XII on "How to Plan a Career after XII". The main aim of the seminar was to help students think more clearly about their goals in life.

The one-hour long session began with stating the importance of making plans for the future. Mr. Nishant (Spokesperson) discussed with students about the significance of setting a pre-determined goal which is realistic as well as feasible at the same time.

The emphasis was given on SWOT (Strength, Weakness, Opportunities and Threats) analysis by Mr. Nishant. He tried to make students understand how SWOT analysis can help them in deciding their goals. A series of steps was also discussed by the spokesperson which can help the students in choosing a career path i.e.

1. Know your interests
2. Choose the right course
3. Know the future prospects

If the above-mentioned steps did not give the clarity regarding the path, students should take the reverse approach. In this approach, he told students to visualize themselves professionally a few years into the future. Once they know that goal; plan in reverse to understand the qualifications that will help them achieve that goal. For example, if they want to be a pilot, plan in reverse and find out the stream/course that best suits the need of their career. Accordingly, choose the course that will help in achieving that goal.

However, if students are still not clear about what path to take, don't fret. Choose a degree in a subject that interests and continue to research. Participate in college activities and interact with people from different professions. Do your best where you are, and eventually, you will find your way?

All guidance provided by the spokesperson in the session seemed very functional and actionable to the students. There were discussions in between and at the end of the seminar doubts and queries of the students were also resolved. Feedback forms were also provided at the end.

### **Seminar: BEST COURSES AFTER SCHOOL (15.2.2022)**

Taking up elective subjects after clearing the Class XII board exams is a choice of a lifetime as it decides the course of career for the students. Be it Science, Commerce, Arts, or any other subject, each choice opens up a range of career paths. For this Paras Institute of Commerce Pvt. Ltd. organized a seminar highlighting the Best Courses After School at Sant Nirankari Public School on 15 February 2022. In this seminar, Mr. Rakesh (Spokesperson) discussed the education courses and career options that open up for students who opt for commerce stream in their senior school years.

The one-hour session began by telling students that commerce is a popular stream among students in India. Having studied Commerce in Class XI-XII allows students to choose from a multitude of courses at graduation level, paving the way for a range of career choices. One of the major benefits that Commerce students have over Arts students is that they are eligible for both Commerce and Arts courses. However, with a wide range of programs available, "What to study after Class XII?" in Commerce stream is a common query that students have. So, to bring more clarity, this seminar shed light on some of the most popular courses after Class XII Commerce which students can pursue.

One such course which Mr. Rakesh discussed in the seminar was Chartered Accountancy or CA which is a prestigious course or an international accounting designation that is granted to accounting professionals across the world. Through this course, students will learn subjects such as tax laws, taxation, corporate law, business laws, and auditing.

This course is divided into three levels, i.e.:

- CPT (Common Proficiency Test)
- IPCC (Integrated Professional Competence Course)
- FC (Final course)

Students need to clear a previous level to take up the next level. CA is one of the most sought-after career options after Class XII for commerce students. The overall difficulty of this course is very high and therefore it might take some students multiple attempts to clear a level. It is among the most paid career choice in the field of commerce.

Various other options such as Marketing, Finance, Human Resources, Accounting, or Business Administration were also discussed during the seminar. The tips were also given to students that before entering the courses, they should research more on the eligibility, salary trends, and jobs available. Feedback forms were also shared at the end of the seminar and all the queries of the students were resolved.
